

Dr. Steven Bryce Inbody

CURRICULUM VITAE

Name:

Steven Bryce Inbody

Office:

Texas Medical Center
Smith Tower
6550 Fannin, Suite 2125
Houston, Texas 77030
(713) 796-0600 [Office]
(713) 796-0303 [Fax]

Licensure:

State of Texas (1985)

Certification:

Diplomate of the American Board of Psychiatry and
Neurology (1989)

Education:

Master of Science, Physiology and Biophysics
University of Illinois
1977 -1979

Bachelor of Arts, Summa Cum Laude
Luther College
1973 - 1977

Medical School:

M. D. Degree
Northwestern University Medical School
1979-1983

Post-Graduate Training:

Chief Resident in Neurology
Baylor College of Medicine
1986 -1987

Residency in Neurology
Baylor College of Medicine
1984-1987

Internship in Internal Medicine
Baylor College of Medicine
1983 - 1984

Dr. Steven Bryce Inbody

Professional Positions:

- 1998 - Present Director of *Consultative & Therapeutic Neurology*:
Consultative Neurology & EMG
Ambulatory Infusion Center
Manual Physical Therapy
- 1994 - Present Editorial Reviewer for CONTINUUM, Publication of the
American Academy of Neurology
- 1994 - 1998 Director of *Consultative Neurology*
- 1987 - 1998 Attending Physician, Neurology Service at The Methodist
Hospital
- 1990 - 1998 Attending Physician, Neurology Service at St. Luke's
Hospital
- 1995 - 1998 Attending Physician, Neurology Service at Hermann
Hospital
- 1994 - 1995 Clinical Assistant Professor, Department of Neurology,
Baylor College of Medicine
- 1993 - 1995 Assistant Professor, Department of Anesthesiology, Baylor
College of Medicine
- 1987 - 1994 Assistant Professor, Department of Neurology, Baylor
College of Medicine
- 1992 - 1994 Co-Principal Investigator: Use of Sertraline for Agitation in
Alzheimer's Patients (Protocol H-1300)
- 1989 - 1994 Co-Director: Information Transfer and Research Training
Core. Alzheimer's Disease Research Center, National
Institutes on Aging Grant 1-P50AG08669-01
- 1989 - 1994 Attending Physician: Clinical Core. Alzheimer's Disease
Research Center. National Institutes on Aging Grant 1-
P50AG08669-01
- 1989 - 1991 Co-Investigator: Evaluation of the Effects of SQ29852 in
Patients with Alzheimer's Disease (Protocol 31438-7)

Dr. Steven Bryce Inbody

1987 - 1989 Director of Clinical Outpatient Neurology, Department of Neurology, Baylor College of Medicine

1987 - 1989 Co-Investigator: Safety and Efficacy of Captopril in Patients with Alzheimer's Disease (Protocol 12928-246)

1987 - 1989 Co-Investigator: Safety and Efficacy of Captopril in Age-Associated Memory Impairment (Protocol 12928-244)

Professional Societies:

American Academy of Neurology
Texas Medical Association
Harris County Medical Society
Houston Neurological Society
American Medical Association
Texas Medical Foundation
American Association for the Advancement of Science

Awards and Honors:

Outstanding Resident Award, Baylor College of Medicine, 1987
Alpha Omega Honor Medical society, Northwestern Chapter, 1982
Outstanding Teacher Award, University of Illinois, 1978 and 1979
President's Award for Outstanding Graduate, from Luther College, 1977

Consultative & Therapeutic Neurology

Consultative & Therapeutic Neurology was founded in September of 1994, by Steven B. Inbody M.D., following his eight-year tenure on the academic faculty of Baylor's Department of Neurology. This transition from academic neurology, to the private clinical setting, was motivated by his desire to develop a neurology clinic devoted to the comprehensive evaluation and treatment of patients in the ambulatory clinical setting.

The basic clinical goals underlying the development of *Consultative & Therapeutic Neurology* include:

- Restoring and protecting the quality time and communication necessary during each physician-patient encounter, which has often been sacrificed in the current health care environment.
- Preserving the comprehensive and intensive diagnostic techniques, including Electromyography (EMG), necessary for complex neurologic problems.
- Maintaining a state of the art, clinic-based infusion center, capable of providing the full spectrum of intravenous therapies currently indicated for neurologic disease.
- Implementation of a collaborative on-site physical therapy program offering comprehensive and intensive manual therapy techniques and neuromuscular massage.
- Developing and integrating an aquatic therapy program utilizing an advanced, current-based pool design.
- Facilitating the transition of indicated patients through a reconditioning program with neuromuscular re-education, supervised by an exercise physiologist.

Consultative and Therapeutic Neurology represents a collaboration in patient care, which has expanded Dr. Inbody's consultative practice to include a spectrum of therapies provided by on-site and full time healthcare professionals including: RNs with extensive ICU experience, pharmacist with clinic dedicated pharmacy, physical and aquatic therapists, and an exercise physiologist.

Dr. Inbody's clinical approach to patients with neurologic disease has developed from his 8 years as a physician-scientist while at Baylor, and more than 14 years in clinical practice. As an author of 23 scientific journal publications and book chapters, and a nationally recognized lecturer at medical conferences throughout the United States, Dr. Inbody currently treats patients from throughout the country and internationally. It is from this scientific platform that Dr. Inbody has utilized his clinical experience and academic background to guide his patient management decisions. His research interests include neuroimmunological diseases such as Inflammatory Neuropathies (ie. CIDP) & Myopathies,

Dr. Steven Bryce Inbody

Multiple Sclerosis, Vasculitis, and Connective Tissue Disease. Other special interests include chronic pain and pain generating mechanisms, for which Dr. Inbody was honored with a co-appointment to the faculty of Baylor's Department of Anesthesiology.

The accompanying curriculum vitae, lists Dr. Inbody's numerous publications in both peer-reviewed journals and chapters in authoritative neurology reference textbooks.
